## Work Experience

### HireVue

#### Software Engineer

*Apr 2022 – Current*

- Maintained client assessments, legacy website, and backend projects using AngularJS, ASP.NET, and Microsoft SQL Server
- Identified opportunity for automation tools to prevent error-prone data entry
  - Created and maintained developer tools to process assessment data without error and minimize our manual processing time, built using Next.js
  - Additional automation scripts also built to manage bulk file manipulation for assessment updates

### RE/MAX, LLC

#### Full Stack Developer Intern

*Feb 2020 – Nov 2020*

- Maintained remax.net, profile.remax.net, admin.remax.net, joinremax.com, and backend projects using Angular, Vue, Laravel, PostgreSQL, and Docker
- Worked self-sufficiently in a remote environment while balancing a second role within company

#### Payroll Specialist/Membership Services Coordinator

*Sep 2017 – Apr 2022*

- Oversaw semi-monthly payroll processing for over 650 employees through UKG
- Created, updated, and ran reports from Cognos BI for payroll needs
- Managed transaction data for agents across 1,000+ offices worldwide

### Freelance

- Designed and created solarcleancolorado.com using Gatsby.js with 100% lighthouse score
